DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I in the reply filed on 08/02/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 6 and 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Ruggieri et al., US Patent 4,365,590 (Ruggieri).

Ruggieri discloses a cage comprising a frame (12), a door (26) having a bottom portion and a top horizontal rod, a member attached to the frame along which the door rides and a cavity in the frame to receive the bottom portion (as best viewed in Figure 3).

Regarding claim 6, Ruggieri discloses at least one cradle attached to the frame to receive the bottom of the one door (note Figure 3 in which the rail mechanism acting as a cradle supports the bottom of the one door and is located near the top of the at least one opening).

Regarding claim 9, Ruggieri discloses a side grate (42) with a top member engaging the horizontal rod (Figure 3).

Art Unit: 3644

Regarding claims 10 and 12, Ruggieri discloses two cradles (i.e. one connected to each sidewall).

4. Claims 1, 2, 6, 8-13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ziegler, US 2,220,436.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-13 and 18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6,694,918. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claims are directed to a cage for holding livestock including an elongated member attached to a frame assembly for the guidance of a door between an open and closed position including lifting lugs on the frame member.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thomas (US 4,285,2990 and Barker (US 1,580,775).
